

Explanation of the above plat accompanying the field notes of the Jas. Taylor, survey No. 6 & 7 and the Joseph Lawrence survey in Slavo & San Saba counties. Taking as a starting point the S. E. corner of survey No. 171 in the name of J. Bodaman this survey is partly in San Saba co. and one of the old colony surveys. We find the bearings of this corner standing and plainly marked. Thence N. 119° W. to the beginning corner of No. 623 in Slavo co., this corner we cannot find, but running N., stopping at a point 1029 W. from beginning corner, and then running S 621 W. the length of the W. line of No. 623,, we find the S. W. corner of 623 and the N. E. corner of No. 624. bearings standing and plainly marked. Then starting from this corner and running the courses and distances called for in the field notes of No. 624 we find all its corners. Then again starting from the N. E. cor. of No. 624 and running S 212 W., and 14 W. we find the N. E. corner of No. 10; and then

counter 36435

running from this corner the courses and distances called for in the field notes of No. 10, we find the distances correct and all the corners; and we find that No. 10 conflicts with surveys Nos 624, 625 & 626. as shown by the plat. We find all the old connecting corners of the Jas. Taylor Nos and it does not conflict with other surveys on the ground.

Jas. Taylor. No 7

Beginning at the N.E. corner of survey No. 624 and S.W. cor. of 623, and running N. 621 we we strike the S. line of No. 170, 193 we W. of its S.E. corner. We find the N. & S. line of No. 623 to be 1029 we instead of 1453 we as called for in its field notes or 426 we short. Thence running W. 2635 we, N. 1100 we & W. 1800 we we find a corner of the J. White survey in San Saba co., established by W. S. Hayes present co. sur. of S. S. county. (see refer you to the field notes of the J. White sur.) and 100 we further W. we find the S.W. corner of No. 7 S. 2 N. established by J. H. Snellings ex Co. sur. of S. S. co. (and we refer you to the field notes of the I. R. R. Co. No 1 in S. S. co.)

Thence S 790 we and 1030 we west we find the old established corner of No. 576, a few we. N. of this corner we find the S.E. corner of the I. R. R. Co. No. 1 made by J. H. Snellings. Thence S. 45 W. 950 we and 869 we S 45 E. we find the E. corner of No. 578, bearings standing. Thence ^W 843 we E. and 657 we S. we find the N. B. S. of No. 12 and 146 we W. from this point we find the N. W. corner of No. 12, bearings standing. Thence E from the N. W. corner of No. 12, 1215 we we find the N. E. corner of No 11 & the extreme N. W. corner of No. 9. plainly marked. (this line is too short) Thence E 40 we we find the W. N. E. corner of No 9. (plainly marked) Then running E. from this corner 1248 we. we find the E. N. W. corner of No. 9. (plainly marked,) this line is 248 we too great according to the field notes of No 9. Instead of No. 626 being cut out of No. 9 as represented by the field notes of No. 9, it conflicts with No. 10 as shown by the plat.

I Jesse Carter County Surveyor of Llano County
Do hereby Certify that the above and foregoing Statement
is correct as I find the corners and lines on the
field - I Given under my hand this 17th day of
June 1882

Jesse Carter Co Sur, L. O. Co -

We can not locate No. 3 H. & T. C. R. R. Co., exactly, we find the S. corner all right, but when we run the W. line N. we find the W. line the distance stops about 225 us S. of the S.W. line of No. 578, and will not touch the S.W. line of No. 579. as it calls for, but we find no corner as described in the field notes; and we further find that the field notes of No. 3 describe the N. corner of No. 579. instead of the E. corner of No. 579, which has no bearing trees. We can not find the N. E. corner of No. 3. on the ground. The surveying of these H. & T. C. R. R. Co. surveys has been poorly done.

Joseph Lawrence survey.

This survey does not conflict with the two Torchand preemptions on the ground; and neither does it conflict with No. 4 H. & T. C. R. R. Co. survey, on the ground, as we find that all the E. C. corners of surveys No. 618, No. 4, No. 580 and 581. to be on one and the same line on the ground, as shown by the plat.
