Cameron May 8th 1852

Mr Crosby

Commissioner of the General

Land office enclosed please find a sketch of surveys of my work made in March and April A.D. 1852 - on the clear fork of the Brazos I have only the use on hand the left of that and cannot make out field notes for a few days yet the sketch shows a correct connection of said stream from its junction with the main Brazos to Fort Phantom Hill and very near a correct plot of the situation of Caddo village which is about 15 miles below Clear fork Fort Belknap is 23 miles above the mouth of the Clear fork by the road and a little east of north the mouth of Clear fork is not more than 40 miles above Jose Ma Reas village and nearly N.W. the South line of Fannin Co. is some six or seven miles above the mouth of Clear fork the line between Milam and Bexar runs from the upper edge of the upper Cross Timbers on the divide between the Colorado & Brazos North 45° West said point is about 35 or 38 miles due South of Phantom Hill so a line running N. W. will run above said fort I wish you would send me the Patent for Daniel Barnhill 640 Headright on Indian Creek waters of Leon in my

with regard to Milam and Bexar

application also a patent for Daniel
Alexander Donation between Little
River and Longhoos creek in Bell
Co. Said Survey was returned
by me last winter and calls
for about 340 acres

Yours Respectfully
Wm Armstrong
District Judge
Alam Dist

The line as agreed upon by both surveyors runs N.W.
and crosses one mile below ^{N.E.} Phantom Hill; the line
according to act of 46, and according to the northern part
of the survey of Milam, — runs ^{N.W.} from a point about
35 miles S. of Phantom Hill (being the uppermost point of
the Croptombur according to the statement of the Milam survey)
between the two lines is a strip about 25 miles wide.

Capt. Crosby Com.
