REFERRED TO MAP

Mr. Bascom Giles
 Land Commissioner
 Austin, Texas.

Dear Bascom:-

Your letter of the 11th Inst. received and I note what you have to say about the Sutton County map that your Office is working up.

All that part of Block "B" H.E. & W.T.R.R.Co., West of the town of Sonora was laid down on the ground course and distance from the N.W. corner of survey No. 85 and the N.E. corner of survey No. 92. The town of Sonora being mainly located on survey No. 85, which was surveyed by Surveyor McNichols. He tied on the ground with witness trees the N.W. corner of the town section, however he has about 353 varas of excess in his survey from the beginning corner of Block "B" on the East to the N.W. corner of the town section, the difference between 1622 varas as shown by Mr.Saunders and 1269 varas as shown by me in my survey.

About the latter part of 1929 or the first part of 1930, at which time I made a survey for the Halbert's and Mrs. Ward, all of the land owners in Block "B" lying West of the town section petitioned the Land Commissioner asking that the N.W. corner of the town section as located by McNichols be recognized and used in locating their land.

The above petition was acted on favorably by the Land Commissioner and my survey was made accordingly.

The Land Commissioner also stated at that time that Block "C" could be built course and distance West from its Easterly beginning corner and would not of necessity have to respect its calls for Block "B" on the North.

The Rice survey No. 144 1/2 was evidently patented on Mr. E.C. Saunders field notes. Mr. Saunders contending that survey No. 92 Block "B" should extend over on the town section to the extent of 353 varas, which at that time would have caused considerable confusion and moving of fences among the Ranch owners to the West of the town as their fences were built on the McNichols survey and not the Saunders survey.

I trust that the above information will clarify the difference that you have mentioned.

Very truly yours,
J.A. Simpson
 Licensed State Land Surveyor

Лета 1939 года

that you have mentioned.

I find that the above information will clarify the difference between the two.

The above difference was pointed out by the witnesses and not the town and working of fences among the town owners to the west of the 323rd street, which at that time would have caused considerable confusion in Block "B" should extend over on the town section to the extent of 323rd street.

The above difference No. 147 I/S was originally patented on Mr. E.C. "B" on the 10th day.

corner and would not of necessity have to be best left only for Block "B" could be built corner and difference west from its original position.

The town commissioner also stated at that time that Block "B" was not in any way made accordingly.

The above difference was noted on the 10th day by the town commissioner and recognized and need in locating their land.

Commissioner making that the M.W. corner of the town section as located on Block "B" lying west of the town section mentioned the fact that I made a survey for the Heppert's and Mrs. Ward, all of the land about the latter part of 1888 or the latter part of 1890, at which time I was in any way.

between 1888 and as shown by Mr. Sandberg and 1890 and as shown by "B" on the east to the M.W. corner of the town section, the difference between 323rd street and the original line from the beginning corner of Block "B" is the M.W. corner of the town section, however he has shown that the town of Sonora being mainly located on the 323rd street with the M.W. corner of the town section located on the 323rd street.

The town of Sonora being mainly located on the 323rd street with the M.W. corner of the town section located on the 323rd street.

of Sonora was laid down on the 323rd street and difference from the 323rd street to Block "B" H.E. & W.T.R. Co., west of the 323rd street.

is working in.

what you have to say about the Sutton County map that you had office

copy letter of the 11th inst. that received and I hope

best reason:
