

May 14th, 1924

Mr. A. L. Harris,  
Lubbock,  
Texas.

Dear Sir:

I have yours of the 28th ultimo, and note your plan of construction of Surveys in the NE part of Terry County, as shown by pencilled sketch attached, which embraces parts of Blocks E, 4X and T. It is noted that your construction of this entire area is based on the connection or call in the field notes of Survey No. 1, Block E, to begin 12 miles N and 12 miles W from the Double Lakes corner in Lynn County, and make allowance for curvature and divergence in projecting your survey West and South from said point.

From an examination of the field notes of surveys in these blocks it is found that Survey No. 1, Block 4X calls to begin 12 miles West and 6 miles North from the Double Lakes corner and Survey No. 1, in Block T, to begin 11 miles West from said corner, according to which each block has a separate and independent tie, or connection from the Double Lakes corner, which will control their respective locations independent from Block E, and should be so located.

In regard to the Double Lakes corner it is noted in a former letter that you state that you have located a point from the Double Lakes corner 246 varas East and 317 varas South from the old corner heretofore accepted and used by other Surveyors. I am unable to pass on the correctness of this old corner, but inasmuch as it has been accepted and used for the past 30 or 40 years in locating surveys in Lynn and other counties West to the State line, it would seem disastrous to abandon same now and adopt some other point for the corner. In consideration of which this Department will continue to recognize said old corner as the proper point from which to locate surveys connected with the Double Lakes corner until same have been otherwise determined by the courts.
