Dear Ben:

As per your request, I have calculated the breakdown of the area of the above referenced tract and they are as follows.

The calculated area between the banks of the Pedernales River is 1.97 acres and the calculated area for the remainder tract northeast of the river is 5.39 acres.

These areas have been added to our Plan 8278 and two copies showing these revisions are included for your files.

If you have any questions or need additional information, please call.

Sincerely,

Marlton O. Metcalfe, Jr.
