

ROBT. E. ESTES
County Surveyor
LICENSED
Midland, Texas

July 24.1926

255

Hon. J.T. Robison,
Commissioner Gen Land Office,
Austin, Texas,

Dear Sir,-

Two Corrected Field Notes please, that Mr. Harry MC. Clontic desires filed if found acceptable- one of section 210, and one of 206 Block F. in Crane and Upton Counties, also sketch.

In offering this work I wish to say about this survey, that Block X. on the West is fixed by its corners, and the direction of the West line of sections 4, 5, 6, 7, 8, 9, is determined from a line over three old corners found and identified, namely the S.W. cor of sec 1. S.W. cor sec. 2 and the S.W. cor of sec. 3. then Easterly 1924 vrs which is the excess found East and West in Sec 88 just south. this, I think would establish definitely the East line of Block X.

Then I allow the full width for the strip embracing section 40, 41, 42, and 52. and 20. I join Block F. on to the East line of this strip running the lines at right angles and parallel to it. also Blk. F. on the North is an extension of the T.&P. South boundary, but taking the course of Blk. X. By running the sections of Blk. F. Blk. E. and Blk. D 1901 vrs to the mile East and West will connect to the T.&P. work at the S.W. cor of section 46. Blk. 41. Tsp. 5 South. T.&P. So I tie Blk. D. E. and F. to this corner and run even miles Westerly, following the T.&P. South boundary until I reach the East line of the strip above mentioned. North and south I ran even miles also, The original field notes to Blocks D. E. and F. appear to be office work, or rather no corners but stakes and earth mounds are called for, and which of course cannot be identified.

The University is run out course and distance from the N.W. cor of Block 42 Township No. 5. South T.&P. and as the West line of Blk. 42 is found to have excess its South line would fall 120 vrs South of the South line of the University Blk. 30.

It is a coincidence that the South line of the University is at right angles to the East line of Blk. X. but the North line of Blk. X. conflicts with the University 4 vrs.

I think my construction of Blk. F. is reasonable and according to law, when all the facts are considered.

So I respectfully submit the above and the enclosed papers herewith for your action.

Very Truly Yours.

Robt E Estes

Licensed surveyor, Midland County Texas.
