GUADALUPE-BLANCO RIVER AUTHORITY

P. O. BOX 271 933 E. COURT ST. 512 - 379-5822 SEGUIN, TEXAS 78155

March 15, 1978

The Honorable Bob Armstrong, Commissioner
General Land Office
Stephen F. Austin Building
Austin, Texas 78701

Dear Commissioner Armstrong:

Transmitted herewith, in accordance with the request by your office, is a photo mosaic delineating the area within the Coleta Creek in Victoria and Goliad Counties that will be inundated by the Coleta Creek Dam and Cooling Pond.

In order to determine the area and acreage within the Project, the Guadalupe-Blanco River Authority employed Tobin Research, Inc. of San Antonio, who performed the following at the request of the Authority:

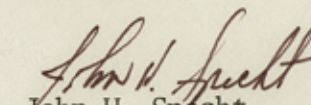

1. Enlarged photography to 1" = 400'
2. Stereoscopically delineated the creek boundaries on these enlargements
3. Planimetered the area within these boundaries
4. Transferred this boundary to a photo mosaic at 1" = 2,000'

The area within the boundaries of the State's mineral ownership was determined to be 459.4 acres.

The Authority appreciates the cooperation received from the General Land Office relative to this Project.

If additional information is needed, please contact the Authority.

Sincerely,

John H. Specht
General Manager
