

Carido Texas July 24th 1874.

Mr. J. Groves Commr,
of Genl. Land Office

Austin

Sir I have the honor to inform you that I have found an error in the field notes that I send to that office of survey No. 18. and 19. made for Santiago Trasts, as the field notes that are in this office of said survey are at true course, and find that the original survey of this land is made magnetic, and at the same time I am informed by the surveyor that surveyed it that he surveyed this land so as No 18. and 19. and that by a mistake he wrote the field notes at true course. My opinion is that if the land is surveyed as it was originally the lines within the limits, and that it would be better for this settlers. please let me know if I shall send you the notes as the land was originally surveyed.

I am Sir very respectfully your
obedient servant.

Cayetano de la Garza
District Surveyor
of Webb District.
