counter 41324

GEO. MYERS,

County Surveyor, \*

\* Zavalla County.

Batesville, Texas, August 16<sup>th</sup> 1900.

How Charles Rogan  
 Care Gen Land Office  
 Austin Texas

Referring to correspondence between our  
 offices yours dated May 26<sup>th</sup> 1900

I find your <sup>river</sup> description & calculations  
 of certain meanders on <sup>river</sup> meander beginning at the  
 Precinct crossing on said river and continuing upwards  
 principally on east side of the river passing in taking  
 in said meanders first crossing county line beyond  
 intersecting ~~the~~ south line of Lawton Stark survey

Third the line used on west side of river for the  
 upper line of Francisco Peyrona Grant. Fourth the  
 point at bend of river from which I ran in 1894 a line  
 connecting <sup>line</sup> to same <sup>corner</sup> meander of surveys 14 and 15 also used  
 the recognized corner of the Francisco Peyrona Grant I  
 found this corner to be 9195.00 S45° 38' W of an pipe  
 connected to in these meanders Fifth the result of these  
 meanders plotted on east or back line of said Grant  
 which I carefully chained and found to be 27649.00 along  
 fence and marked <sup>line</sup>; I saw upper line of Grant to be 10089.00  
 Sixth Miss Pratt and Hays had in their enclosures  
 counter 41325

Batesville, Texas, *2*

190.....

what is claimed and deduced here as the lower 1/3 of the Pedro Jose De Aguirre Grant and meanders show where the upper line is situated.

South They also have a small strip known as the lower 1953 acres of the Antonio Aguirre Grant and it is at the upper river corner of this <sup>strip</sup> ~~grant~~ meanders terminate

I also carefully chained this upper line finding it to run N 64 1/2 E 694500 also chained the south line of said Narciso Aguirre Grant finding it 1002300

My ~~or~~ intention was to take the meanders equally on each side of river an account of portions of it where it is impossible to ~~get~~ make an accurate survey along where a meander line should run, an account high water I was compelled to take most of the meanders on the east side of River and have added to the result of calculation on the east side 100 acres of land and deducted from result on west side. This would be very close to result if I could have taken the meanders all the time along either bank of river.

B. Shows that the Francisco Puyora contains  
 Below Co Line 14397 acres below Co Line  
 Above " " 21730 36127.

Batesville, Texas, 11

190.....

These papers do not contain Field notes but translate for description of Narciso Aquirre as follows,

Beginning on the Bank of Nueces River where Precidia <sup>road</sup> crosses it  
Thence N. E. by the Campass a distance of 10000 vs.

Thence a line upwards and parallel with the river a distance of 27500 vs measured upon a perpendicular to the first line

Thence a line a parallel to the first line a distance of 10000 vs to the River

Thence down the river &c.

The Antonio Aquirre begins above Narciso and has the same calls

The Pedro Jose de Aquirre begins at upper corner of Francisco Peyrona runs with its upper line 10000 vs and then has the same calls to close

The Francisco Peyrona title is not in our records here and I hunted in Dimmit County for it a few years ago but failed to find it. I suppose it has the same calls as I found title of Grant below it recorded in Dimmit County and it called for division line between the two Grants to run S 20 W marked 10000 vs.

In surveying these grants the surveyors

counter 41328

Batesville, Texas,

3'

190

into corrected their lines on the ground also the Draftsmen  
of your office and of Texas Land Dist have run the begin-  
ning line the 100000 as called for then laid off line 275000  
parallel to the river making the closing line to run 100000  
and the adjacent surveys have been located accordingly  
for this reason the Grants taken as a whole do not  
contain as much land as their title papers call for  
to change now and run the lines called for would change  
the whole all boundaries and endless confusion would  
follow such a step

Taking into consideration all connected  
with the above I think the application of Miss Pratt  
and Hays to have the Tax abstracts corrected to correspond  
with the lines shown on sketch is feasible and I will  
furnish such other notes, certificates as to acreage as  
you may require

Also corrected notes of Lantry Purge  
and Thamosan surveys that the printed abstract of acreage  
may be corrected to proper acreage

Please advise me fully upon receipt of  
this as to such further information and papers needed  
Yours truly

County Surveyor, Zavalla Co. Texas

Survey No - - - -

The State of Texas } Field notes of a Survey of  
County of Zavalla } 512.96 acres of land for the  
owners and assignees of an 11  
League Grant claim issued to Pedro Jose De  
Aguirre. Said survey is in Zavalla County, Texas,  
on the waters of the Nueces River, about 12 miles  
West of Batesville.

Beginning on the West bank of the Nueces River at  
a stake set for the N.E. cor. of the Peryra Grant, S.E. corner  
of this Grant. Thence up the River with its meanders  
as follows:
