

OFFICE OF
NAT. G. WALLER, COUNTY SURVEYOR,
BRISCOE COUNTY.

2178

SILVERTON, TEXAS, February 9 1894

Hon W. L. Mc Gaushey

Dear Sir
Yours of recent date to the Co Clerk
concerning the V. Co. lines did not
get in before the Court at its
regular term but they meet soon
again and the matter will go before
them then.

The position of Sur. No 11 A + G
I am satisfied is correct - I found
its S. corner of 11 & to be true
that it was correct & made connec-
tion with the W corner of Sur No 23
from which a stone marker on hill by
Nos 6 & 22 runs

The NW corner of 1 A + G & the
SE corner of Sur No 49. I found
on a bluff of River
To more fully satisfy myself

2nd

SILVERTON, TEXAS,

189

That it was the correct corner
I measured to its SW corner
^{hook} with mound in Mesquite flat one rk
marked X from which I run to PK
to S 89° W Goodnight PK to S 72° W
+ High PK to S 70° W. and the dis-
tance called for in the field notes
with the cor. line is ~~correct~~ correct
I am confident

When the Field note of the N
boundary line was returned there
was nothing said about the con-
nections not having been made from
all the corners of survey through
which the Co line passed

When surveys had no established
corners which could be identified
I did not give the distances from their
corners for they would have to be plotted
in by course & distance

Most respectfully
W. Waller, Co. Sur.
