

Sketch Map of the Boundary Line between the County of Cooke and the County of Grayson.

The State of Texas
County of Grayson
I, Samuel Bonham, duly appointed and authorized by the County Court of Grayson County, Tex., and W.W. Howorth, duly appointed and authorized by the County Court of Cooke Co., Tex., to establish, mark and measure the eastern boundary line of Cooke County and the western boundary line of said Grayson County, do hereby certify under our oaths that the above and foregoing sketch map is a true representation of said line as defined by us, and the surveys through which it runs and the natural and artificial marks called for in field notes of said line are correctly represented above. On testimony whereof, we, the undersigned, our official signatures on this the 12th day of Nov. A.D. 1881,

Samuel Bonham, C. S. H.
W. W. Howorth, Special Sec. of Ex't.

The State of Texas
Grayson County, J. A. Dickerman, Clerk of the County Court of said County do hereby certify that the foregoing sketch map and the attached field notes are correctly copies of the originals on file and of record in this office.

To certify which I vererunt set my hand and impress my seal of office at Sherman this 1st day of February A.D. 1882 J. A. Dickerman,

County Clerk

Filed Feb 3rd 1882.

Filed March 2nd 1882.

Count 58928

The State of Texas

To certify which I vererunt set my hand and impress my seal of office at Sherman this 1st day of February A.D. 1882 J. A. Dickerman,

County Clerk

Filed Feb 3rd 1882.

Filed March 2nd 1882.

Proposed plan for woodland removal & re-planting to reduce potential fire hazard and to increase diversity and habitat for birds and other wildlife. The proposed plan includes the following steps:

1. Removal of all dead and dying trees, including those affected by bark beetles.
2. Thinning of live trees to reduce fuel load and improve tree health.
3. Re-planting with a mix of native tree species, including aspen, birch, and conifers, to restore forest diversity and resilience.
4. Monitoring and evaluation of the results to ensure the plan is effective and make adjustments as needed.

The proposed plan aims to create a more resilient forest ecosystem while reducing the risk of catastrophic fires. It also considers the needs of local communities and wildlife.
