Mr R. B. Levy,
County Clerk Gregg Co,
Longview,

Sir: Yours of the 1st inst; with field-notes of the south line of Gregg Co as run by the surveyors of Gregg and Rusk Counties has been received. I will state in reply that the field-notes are not satisfactory. There is no course or distance given from the S.E. corner of Gregg Co to two or more ~~survey~~ corners of the survey upon which the corner of the county is located. Also after passing the first four surveys on the line, there is no course or distance given from one or more of the corners of the surveys, through which the line passes, therefore the line cannot be applied or approved nor can accurate correction of the abstract be made until the above required data be furnished this Office.

Vol. 247
No. 443
Recd # 191-ES

You will please call the attention of the respective surveyors to the objections herein stated that they may take steps to comply with the requirements made &c.

Respectfully,

(C)

Commissioner.

Gregg Co. Bdry. Line No. 9

May, 4, 1889.

Mr L. von Brandenstein,
Surveyor Kendall Co,
Boerne, Texas.

Sir:- Yours of the 22nd ~~inst~~ ult; with corrected field-notes of the C. F. Bergemann 160 acres school land purchase in Kendall Co has been received, and the correction filed and passed for examination. Section 1570 of the G. C. & S. P. R'y Co in Kendall Co is school land, and is not subject to settlement by pre-emption. The C. Ramirez pre-emption has not been patented, and I am not prepared at this time when it will be patented. If said pre-emption should be patented, the remainder of said section would not be subject to pre-emption or homestead, but would have to be purchased under the school land law.

Respectfully,

14998. Bexar P. 6247. (C)

Commissioner.

May, 4, 1889.

Mr R. B. Levy,
County Clerk, Gregg Co,
Longview, Texas.

Sir:- In reply to your favor of the 23rd ult; enclosing field-notes of the Southern boundary line of your county, I will state that the same cannot be accepted, as the law regulating the surveying of county boundary lines, has not been complied with. I respectfully refer you the act of April, 22, 1879 and the amendment of March, 8, 1885, and instead of giving distance from a line of a survey, the course and distance should be given to the county line from one or more corners of the surveys through which the county line passes, and especially from the Southern corners of the surveys that border on the Sabine as there is no data in this Office to definitely locate the river.

Respectfully,

Commissioner
