J. T. L. Crews Surveyor duly appointed and qualified by the Commissioners Courts of Hale, Floyd, Swisher and Briscoe Counties to locate their County Boundary lines did on the 6th day of June, ^{A. D. 1892} proceed to locate the said boundary lines in the following manner. at

at the S. W. corner Hall County I established a true Meridian line, and from this Meridian so established laid off an angle of 90° to the West for a perpendicular to the Meridian line at that point and from this point produced this perpendicular line to the Westward making due deflections ^{thereof} from for the curvature of the Earth and by so doing located and marked a true parallel of latitude for County boundary lines between Floyd, Briscoe, Swisher and Hale Counties I also located a true Meridian line between Floyd and Hale Counties, and Hale and Lamb Counties for the common boundary lines of the respective Counties.

Great care was given to measurements and course and the lines were well and permanently marked as will appear from accompanying Field Notes and Map.

For more complete and full description of means and methods of establishing Meridian and other lines, for measurements and deflections on

Parallels of Latitude reference is made to my report now on file in the General Land Office on the work of locating the Boundary lines of Childress County which report and methods described therein have been carefully followed in this work.
