

Hon R. H. Storms

Co Judge Kenville

Dear Sir

I will call your attention to some other matters in your County, and ask for information upon them. The County Line between Edwards & Herk Counties run by J. H. Davis & Jos Buswell between June 1st & 8th 1892 was Examined & approved & applied by this department as correct on June 20th 1892. Said Co Line calls to run 50 ⁰⁰ East of the NW Cors of surveys 17-18-22-36-47-62-70-88 & 99 H E W T R R. BK "D" and along the west lines of surveys 1806-1696. & to pass over the corners of Martha Ethridge & Mrs A. Hordie thereby showing the relative position of all of said surveys to each other - After words to wit on Sept 30th 1892 said J. H. Davis as County Surveyor surveyed and forwarded to this department a Homestead Donation of 160 acres for one John Pallock - beginning at the N. E. Corner of Sec 50 BK D & running North 10 88 1/2 W & E 830 m calling for the west line of survey 1077. B 5 & 4. Now it is practically impossible for any vacancy to exist for the Pallock survey if the connections called for on the County line are correct. if vacancy exist for Pallock's survey the calls on Co Line are erroneous, Can you ascertain which is correct and very much

oblige. Your Commissioners Court cannot be
more economical than have such connec-
tions run as will procure a correct compi-
lation of your County Map as a basis
of Taxation

I very much dislike to so often
call upon you for information but consid-
ering the importance to your County as well
as to this office makes it necessary that some
information be had in view of so much ex-
cessive surveying having been done in the
past - if your Surveyor or other reliable
source know of conflicts please have them
state where & how much

Respectfully

Comer

Warren
