At or near the termination of every mile around the County I erected, a Mile Post

Carving the letters P. C. S. on the mile Post and likewise the number of the mile Post with the letters M. P. annexed. In the Grand Prairie I set up mile Posts with the letters P. C. S. on one side and on the other side the number of the mile Post carved in figures with the M. P. annexed. ~~But in the timber~~ which embraced three fourths of the County line I made use of standing trees for mile Posts carving the letters P. C. S. on said trees and likewise the number of the mile Post in figures with M. P. annexed, immediately beneath the letters P. C. S. In a very few instances where trees were not sufficiently near the spot for mile posts, I set up a stake for a mile post and made a bearing or witness tree to the mile Post carving as usual the letters P. C. S. and the number of the mile post with the letters M. P. on the witness tree beneath which I carved in plain Characters the course and distances from the witness tree to the mile Post. Where the line runs through timber I had it well marked with chops and hacks. I likewise carved the letters P. C. S. on the trees where the line crossed the principal roads. This survey was commenced on the last day of March A. D. 1856 and finished on the 17th day of April next following; and it was made pursuant to an order of the County Court of Parker County issued on the 20th day of March

AD 1856 authorizing the survey of the
County — The variation of the needle is nine
degrees and nearly one half East
