

The State of Texas } I L. W. Brown Special
County of Stephens } Surveyor of Stephens County
Texas do hereby certify concerning the establish-
ment of the North East Corner of Stephens
County Texas, at a point in the South line of
Yummy Co. 30 miles West of the West line of
Dorrier County, that to ascertain and find said
point in the South line of Yummy Co. I began
at the North West Corner of Dorrier County which
I found to be a heavy mesquite Post about 4
inches square now much decayed and split
into two pieces, on one of which was E and
on the other S. This post was lying on the ground
and near it had been erected a stake and was named
a Post also about 15 inches in diameter fossil and
marked "VWC (PC N 19 E 84 vs S" by 319' W
84 vs. The pecker holes had pecked holes in the
top destroying a part of the first letter (N) and
the lower part of the letter P. R and a part of the letter
O in CDR were grown over, leaving only what is
above given showing. A dead mesquite stump
that did not bear any more bears S 74 1/2 E 30 vs
The S.E. Corner of N.E. & L Co. Sur. No 2568 identified
by both its bearings bears S 80 1/2 E 456.6 vs and the
South West Corner of this survey identified by one
of its bearings ~~is~~ is 1344 vs West of the S.E. Cor.
An old marked line runs South from the ~~South~~
above described corner.

Thorough search was made at and around a
point N 80 1/2 E 457 vs from the S.W. Cor. said survey
2568 N.E. & L Co. but no trace of any corner could
be found. I was shown the above described
corner by an Capt. gentleman named Price
upon whose promises it is situated who claims
to have lived by and known this corner since

about the time it was established and that the
post shown me was the one first seen by him
soon after the establishment of said corner.

From this point I ran West 30 miles and South
3 miles and 533 rods to a point in the South line
of Young Co. for the North West corner of Palo
Pinto and the North East corner of Stephens
County. The distance from North West corner
of Porter county was carefully measured by
experience chainmen who were kept in front
of the transit the front chainmen carrying a
rod by which he was brought in line before
laying down the measure of each chain.

Respectfully Submitted Aug. 15th 1889

J. W. Brown

Special Surveyor Stephens Co. Tex.

Stephens Co Bdry Line 4

Report of Survey
Establishing N.W.
Cor Palo Pinto and
N.E. Cor. Stephens Co.

To Hon R.M. Hall

Send to R.M. Hall at
once if convenient
