The State of Texas
County of Swisher

I T. L. Crows
surveyor duly appointed and
qualified by the County Judges
of Briscoe Hall Floyd and Swisher
Counties to locate their County
Boundary lines, each County
Judge acting under instructions
from his Court; did
on the 8th day of June proceed
to locate the same in the following
manner

At the S.W. Corner
of Hall County I established a
true meridian line from this
meridian so established I laid
off an angle of 90° to the west for
a perpendicular to the meridian at
that point, from this point
I produced this perpendicular
line to the west ward making
necessary deflections for the
curvature of the Earth and by so
doing located a true parallel
of Latitude and marked same for the
Boundary lines between Floyd,
Briscoe, Hall, & Swisher, Counties
I also located a true meridian between
the Briscoe and Swisher Counties
between Floyd and Hall Counties
and between Hall & Lamb
Counties for their Common
Boundary lines Great
Care was given to measurements and
course and the lines were well

16

and permanently marked as will
be seen from accompanying notes
and plat

For more complete
and full description of means
and methods of Establishing
meridian lines and other lines
for measurements and deflections
on Parallels of Latitude
Reference is made to my report
now on file in the Gen. Land Office
on the work of locating the
Boundary lines of Childress county
which report is very elaborate
and which methods described therein have
been carefully used in making
the locations herein referred to

In testimony of which I
hereunto set my hand at Tulia,
Swisher County, Texas this the
25th day of July A.D. 1892
