

File 27  
County Boundaries  
Travis & Bexar.

Remarks of W. L. Usher in  
regard to plotting the N. W. bound-  
ary of Travis on the map.

Travis Co Bdry Line 27

Usher's notes on the  
Boundary question  
of Bexar and Travis  
Annotated with illus-  
trations, and refer-  
ences to maps &c

Differences in line from Bartok & the Colorado  
1850 survey - The difference in fact - 51,092 paces  
The fact here in the program of the survey was not  
then when applied to the map of Bartok Co. shows the  
mouth of the survey over near the survey of Bartok  
but a long way above the survey of Bartok at  
the Colorado survey & settled the Colorado at the  
survey of A. Johnson. 1853 - The first & second  
stations on the Colorado agreed & also the 1st upper point  
on the Guadalupe, very nearly, but by summing  
from said upper point as the law requires - 18 1/2 B, the  
it strikes the Colorado is well being the point on  
the Colorado a long way above the point assigned  
to by the surveyor. In view the County Reg-  
ulation of Bartok is better correct
