

THE GRAPHIC LOCATION OF THE 3 MARINE LEAGUE LINE ON
THE ENVELOPE SYSTEM

Locating the 3 marine league line (10.36 miles) out from the shore line of the Gulf of Mexico, as shown on the Gulf Coast Maps, was done in the following manner.

The proportional divider was set for scale of maps and beginning from the graphic location of the shore line of the Gulf of Mexico near the mouth of the Sabine River the arcs were drawn from the intersection of tract lines with the shore out to the said 3 marine league line.

At the mouth of the rivers and passes where harbor improvements are located, arcs were drawn from end of the improvements. Following the intersection of the arcs the graphic location of the 3 marine league line was drawn from the Sabine River to the Rio Grande.
