Gentlemen:

Will you please furnish me with:

1st. Highest observed water level above  
annual sea level for each of 19 consecutive  
years (1938-56) and the average of the 19  
values thus obtained.

2nd. The highest high water produced by  
the periodic tide at Galveston during the  
19-year period (1938-1956).

Thanking you in advance for this information, I

am

Sincerely,

*Boyles*  
J. S. Boyles

Mr. J. S. Boyles  
200 Stewart Building  
Houston 2, Texas

Dear Sir:

This is in reply to your letter of June 13, 1957 requesting observed and predicted water levels at Galveston, Texas.

A table of observed water levels for the 19 year period (1938-1956) is enclosed.

The highest high water above annual sea level produced by the periodic tide at Galveston during the 19 year period (1938-1956) was 1.2 feet.

Very truly yours,

*Robert W. Knob*

Assistant Director

Enclosure

p.s. Not only did I enjoy, but I also profited, by our philosophical talk the other day.
