November 26, 1934

RESURVEY SECTION 10,
BLOCK A-34, PUBLIC SCHOOL LAND,
ANDREWS COUNTY, TEXAS.
YOUR F-74199

Hon. J. H. Walker, Commissioner,
General Land Office,
Austin, Texas.

Dear Sir:

We wish to thank you for your letter of October 27, 1934, and for the further information which your Mr. Blucher was kind enough to furnish the writer verbally.

While we do not wish unduly to encumber your files on this matter, we feel that the last paragraph of your letter of October 27 calls for an answer, since you seem to imply that, unless we are aware of some error in the resurvey and can furnish data demonstrating that error, we will be placed in the position of waiving our objection. We do not so view the situation, and wish to reaffirm our position.

It is perhaps unnecessary to say that our protest in relation to the corrected field notes of Section 10, filed by Robert E. Estes and approved by you, was not intended as a criticism of your action or even as a positive assertion that the field notes are not correct. We do not know whether they are correct or not. If they are correct, that is, if they describe the same land described by the original field notes and covered by our mineral lease, we obviously have nothing to object to, but, if they do in fact describe some other or different tract of land, we feel it necessary and proper to make and maintain the assertion that we now claim, and will continue to claim, under our oil, gas and mineral lease, the mineral interest conferred by such lease on the exact tract of land covered by the original field notes of D. Boone.

E. R. CREWS LEASE
Andrews County,
Texas

Hon. J. H. Walker, Commissioner
General Land Office
Austin, Texas

Dear Sir:

It appears that Survey #10, Block A-34, Public School Land, Andrews County, Texas, was surveyed by one D. Boone October 17, 1900, the field notes of said survey being recorded in Book A No. 1, page 180, Records of the County Surveyor, Andrews County, Texas.

We presume that the same field notes were filed in your office at about the same time.

From certificate of facts dated October 1, 1930, addressed to this Company, it appears that the north three-fourths of said Section 10 was awarded to E. R. Crews January 27, 1903, same having been classed as dry grazing.

Under date of September 24, 1930, E. R. Crews and Jessie Crews, his wife, executed an oil and gas lease to The California Company covering the north half of said Section 10, said lease being recorded in Volume 24, page 335, and in Volume 24, page 632, of the Deed Records of Andrews County. By said lease there was conveyed to The California Company an interest in the oil, gas and other minerals in and under the north half of said Section 10, subject to the terms and conditions of said lease.

Under date of July 14th, 1934, we are advised that certain corrected field notes of said Section 10 were filed in the office of the County Surveyor of Andrews County, and were recorded in Book No. 3, page 127, of the official records of said surveyor, said corrected field notes having been filed by Robert E. Estes, licensed land surveyor, Midland County, Texas, and presumably based upon an attempted survey or re-survey by him.

We are further advised that corrected field notes of said Section 10 were approved by you and were filed in the records of the General Land Office on or about August 31, 1934. We are not advised whether the corrected field notes approved by you and filed in your office are the same corrected field notes referred to in the paragraph immediately above, but we presume they may have been, since we have heard of no other survey or re-survey of said Section 10, except by Estes.

The land awarded to E. R. Crews was the land described in the original field notes of D. Boone above mentioned describing said Section 10. The land covered byThe California Company's lease is the north half of said Section 10 as surveyed by D. Boone and described in his field notes, and The California Company has always claimed, and still claims, that its oil and gas lease covers the identical land surveyed by D. Boone and described in his field notes and does not cover any other or different tract of land which may have been surveyed in any "re-survey" or which may be described in the "corrected" field notes of Robert E. Estes above referred to.

The California Company did not authorize or participate in any survey or purported re-survey of said Section 10 by Robert E. Estes, or by any other person, and The California Company did not consent to or approve the filing of said corrected field notes by Robert E. Estes in the office of the County Surveyor of Andrews County, or in the filing of said corrected field notes or any other corrected field notes by Estes or by any other person in the General Land Office, but all these things were done without the knowledge or consent of The California Company, and The California Company hereby asserts that it is not in any manner or degree bound or affected thereby.

We request that you acknowledge receipt of this letter and advise us of the present status of this matter according to the records of your office.

Respectfully yours,

THE CALIFORNIA COMPANY
