COPY OF LETTER FROM LAND OFFICE TO

Walsh MAURICE B. MOORE

Oct. 3, 1879

Maurice B. Moore, Esq.
Austin

Sir:

You are hereby notified of your appointment as a commissioner or inspector on behalf of the State of Texas to accompany the surveyors Messrs. C. W. Holt and R. M. Thomson who have contracted to survey one million acres of land for the University of Texas.

Your duty will be to see that the surveyors select and survey the best land to be procured, rejecting such as is unfit for either agriculture or pasture, except where it may be necessary to include a small portion of such inferior land in order to secure living water. You will also see that at least two corners of each survey are marked with stone or earth mounds, and that the corners of the blocks, not to exceed six miles square, are marked with earth or stone mounds, at least three feet high and six feet in diameter at the base.

You will also keep a memorandum of the Blocks and Surveys and note the character of the soil, grass and timber and the water, if any. If no water on the land surveyed note how near the water may be found.

It cannot of course be expected to procure good first class land, but you will accept none which will not yield good grass for pastureage.

Yours respectfully,

W. C. Walsh
Commissioner Land Office

NOTE: Vol. 100, Page 241.
