THE MITCHELL INTERESTS NUMBER ONE VENTURE

You Are Invited to Join Me in My No. 2 Offer Which Should Be More Profitable Than No. 1

Col. Humphreys'
\$100,000 Per Day

(From Texas Oil Ledger.)
Colonel Humphreys, the Wildest Wizard of Mexia, is receiving almost \$100,000 per day from his producing wells. His wells are producing almost four times as much oil as the entire state of Pennsylvania. Oil runs to storage and tank car shipments from his company for the twenty-four hours ending at 7 o'clock this morning amounted to 60,700 barrels. And it must be remembered that the Colonel has scarcely scratched the surface of his prolific and vast amount of oil acreage. In other words, one might say, "He ain't begun to make money yet." Wait until he gets his pipe lines laid to his properties so he can really open up his wells. Wait until he really begins to develop his eight thousand acres of proven oil leases in Mexia. Wait until he opens up new oil fields in Kaufman, Titus and other counties where he has already started operations. Instead of his present income of \$4,000 an hour it should be—well, wear out your own pencil.

Oildom's Greatest
Success

A master mind—a great organizer

—a pioneer—a genius with extraordinary foresight and a man whose untiring energy fashions success in a big way; this describes briefly Colonel A. E. Humphreys, the outstanding success of all oildom. Measured by his deeds or measured by his dollars he ranks with the greatest of the great.

Colonel Albert E. Humphreys and Mr. F. Julius Fohs have made a remarkable record in opening new oil fields, and in realizing large profits from the sale of their properties. Their first venture was the Boynton pool in Oklahoma, where their interests were sold to the Carter Oil Company for \$500,000.00, after receiving more than \$500,000 from royalties and other interests. The Humphreys-Fohs Syndicate after opening the Big Muddy pool in Wyoming, sold half interest in 500 acres to the Ohio Oil Company, for \$500,000.00 cash, and organized the Merritt Oil Corporation, which took over the syndicate holdings in Elk Basin and elsewhere. Control of Merritt was subsequently sold to the Midwest at a figure said to have been around \$5,000,000.00. Subsequently they opened the Billings pool in Oklahoma and sold one-half interest in 520 acres to Gillespie & Guffy for \$1,500,000.00, and in addition to the half interest, retained 6,300 acres. Then came the sale of the Dixie Oil Company, in Louisiana to the Standard of Indiana, for a consideration said to have been around \$1,500,000.00. Their next big deal was the opening of the Mexia field, and today Col. Humphreys is undoubtedly the biggest independent producer of high-grade petroleum in the world.

The Great Desenberg 25,000-Barrel Gusher that came in startling the world—Within ten days time after the well came in the Magnolia Petroleum Company purchased the well and forty-eight acres for One Million One Hundred Thousand Dollars. At the present price of oil it would have brought considerably more.

KAUFMAN COUNTY LEASES JUMP
Magnolia Finds Sand on Cernoch Farm.
Special to Dallas News, Feb. 16, 1922.
Oil encountered by the Magnolia Petroleum Company in Kaufman County in its first well on the Frank Cernoch farm. Tuesday caused prices on leases and royalties in that section to advance in some cases as much as 100 per cent.
Oil men said reports of the Magnolia's find was the best oil news received in months.
There are now seventeen wells drilling or under contract.

H. F. Mitchell

A TRIED AND PROVEN PLAN

THE MITCHELL INTERESTS plan to follow Col. Humphreys and his well organized staff of geologists, headed by Col. Humphreys' partner, F. Julius Fohs, in their tremendous development campaign now under full headway in Kaufman, Titus and other counties, east of the Balcones Fault.

Just as quickly as I was convinced that the "big play" of the Kaufman and Titus Counties fields was backed to unlimited extent by Col. Humphreys and all the major oil companies, I got right out into the field with my consulting geologist, Mr. F. C. Dodson, and one of the oldest scouts of the State, and secured several close-in blocks of acreage. (See map, which gives you the location of these splendid leases.)

OBSERVATIONS OF A BANKER

I have carefully watched the development of every great oil field in Oklahoma and Texas during the last fifteen years. I have seen the deposits of banks increase by millions in a few weeks. Millions of dollars have poured into these States from all over the country, to be used for investments in oil properties. I have actually counted fortunes for men who only a few weeks before did not have enough money to pay their bills. Fortune after fortune has been made in every field in these States, and I believe that I can say with authority that most of these fortunes have been made through the resale of leases. Protection acreage originally purchased for a few hundred dollars an acre and soon re-sold for many thousands.

Is it any wonder to you that I lost some of my conservatism as a banker and became actively engaged in the oil business myself?

No doubt, you have sometimes thought that if you could only feel sure of getting a fair deal you would like to put some money in the oil business and participate in the enormous profits earned by legitimate operators.

THE REASON I OFFER YOU THIS OPPORTUNITY IN MY NO. 2 ENTERPRISE

The oil business requires real cash. Notes, promises, etc., don't buy leases. To do business you must have the money. I am not in a position to finance this entire proposition myself. If I could, I would gladly do so, as, in my opinion, it is going to be a bigger winner than my Number One offering, which earned 100% for my interest holders. It is only a question of how large our returns will be when these properties are sold.

Mexia Lease Sells for
\$26,500 An Acre

Mexia, Texas, Nov. 2.—The Shurtz-O'Brien interests with considerable property in the Mexia field have disposed of a part of the holdings here for the sum of \$26,500 an acre. The property sold lies in the vicinity of the Desenberg well of the Magnolia Petroleum Company and was bought by Simon et al.—Fort Worth Star-Telegram.

Greatest Geologist of
the Age

Accredited with a series of oil discoveries too numerous to count on one's fingers and with the great Mexia field as his latest discovery, F. Julius Fohs stands out pre-eminently as the greatest geologist of the age. At this writing, oil experts are freely predicting that Mexia is but the first of a series of fields to be uncovered by Mr. Fohs in East Texas, and that this territory is destined to be the greatest light oil district in American oil history.

Believing that the West would provide greater opportunities for the application of his scientific attainments and geological knowledge, Mr. Fohs left the State Geological Survey of Kentucky in 1912, and entered the Mid-Continent field, locating in Tulsa, Oklahoma. It was here that he met Col. A. E. Humphreys, who after witnessing the almost uncanny skill of Mr. Fohs, decided to form a working partnership with him.

Today the entire world knows of the wonderful success attained by Mr. Fohs and Col. Humphreys in the oil business. It is expected that from now on Mr. Fohs will keep the great Humphreys interests busy drilling on the many structures he has located in East Texas since the discovery of Mexia.

Magnolia Sets
New Record Price

Pays \$2,000,000 for 55-Acre Roller Tract

(Special Late Wire to National Oil Journal)

Mexia, Nov. 24.—Mexia oil prices hit a new high level today when the Magnolia jumped the price of the Roller well, with 55 acres from \$1,000,000 to \$2,000,000.

On Tuesday the Atlantic bought this tract for \$1,000,000 and today the Magnolia doubled their price and paid them a cool million profit for the well.

This sets a new high record of a little better than \$36,000 per acre.

\$7,000,000.00 was paid recently for a one-seventh interest in Col. Humphreys' Mexia holdings, and it is reported that the total assets of his various interests now approximate \$100,000,000.

JUST AN EXAMPLE SHOWING OUR CHANCES FOR SUCCESS

A little over one year ago, Col. Humphreys' Mexia proposition was not as good looking as mine is today, for there were no 10,000-barrel gushers to prove his holdings. COL. HUMPHREYS COULD CASH IN HIS HOLDINGS IN THIS FIELD TODAY FOR ONE HUNDRED MILLION DOLLARS. A PRETTY GOOD YEAR'S WORK FOR HIMSELF AND THOSE WHO HELPED FINANCE HIM. MITCHELL INTERESTS HAVE EQUALLY AS GOOD AN OPPORTUNITY TODAY.

APPLICATION AND PLEDGE

Address All Communications to
MR. HENRY F. MITCHELL, Trustee,
MITCHELL INTERESTS,
705 Security State Bank Bldg.,
Fort Worth, Texas.

Dear Sir:

Enclosed find my remittance for \$.....in full payment of.....interests in the MITCHELL INTERESTS, at \$20.00 per interest, fully paid and forever non-assessable. In making this investment, I do so with the understanding that I am to receive a certificate of interest entitling me to my pro rata share of any and all profits derived from the sale of MITCHELL INTERESTS leases. That you further agree to furnish me a financial statement at any time I so request. If my application and money is received by you after the amount of this issue is subscribed you are to return my money by first mail.
CAPITAL: \$50,000, Interests \$20.00 each.
