Coldren Land Company

CERCEREEECCGEECEEEECE

MAIN OFFICE 719-720 New York Life Bldg. KANSAS CITY, MO.

100,000 Acres of Texas Pan Handle Land Situated in Parmer and Bailey Counties on the Main Line of the Atchison, Tombes & Santa Fe Bailway.

Why Buy our Lands? A few Reasons Why.

The soil is of the choicest to be had in the Pan Handle They are not 30 miles from market. They are not 30 miles from market. The water is not from 400 to 1,000 feet from the surface. The water is only from 5 to 85 feet from the surface. This fact we will demonstrate on the property and will sink a well while you wait. Ninety-five per cent of the sales already made on these lands have been to actual settlers, many of whom have already begun to improve the land for permanent homes. The building of homes in a locality rapidly advances price of lands in the neighborhood. Buy from us and get the benefit of this advance.

A Few Pointers for Land Prospectors and Settlers

in the States? Did you ever stop to in the Union grow enough wheat for before all lands of that quality will at least be worth \$100.00 an acre, and eventually much more. It makes no difference where the land is, whether it is in Illinois, Iowa, or Texas, for as sure as water seeks its level so sure will good farm lands sooner or later reach their true value. Money is plenty and cheap, and much of it from now on will go into farm lands, as there is no investment that is as safe and profitable. First-class lands can now be had in Texas at a price that will pay a reasonable rate of interest on the investment.

LISTEN TO US.

We have the only large body of truly shallow water alfalfa land on which the water is from only 5 to 20 feet, in the entire Pan Handle of Texas. This statement is made to court an investigation of our proposition, and if this statement is found to be untrue we stand ready to pay the railroad fare of the person who will visit the Pan Handle and find that we misrepresent the facts.

Make them dig a well to show depth to water and supply.

Write us for Further Information.

RAINFALL

The Government Weather Station for this district report for the past 11 years an average annual precipitation of 23% inches. The average monthly rainfall at Amarilla during the cropping season for the past 22 years is

April	1	6		2.11

PRODUCTS

Wheat 20 to 30 bushels per scre. Indian Oorn 25 to 40 bushels per acre. Oats 40 60 bushels per acre. Kaffir Corn 40 to 60 bushels per acre. Kaffir Corn 40 to 60 bushels ner acre threshed and 3 to 5 tons of fodder per acre. Milo Maize 30 to 40 bushels threshed and 2 to 5 tons of fodder per acre. Sorghum 3 to 5 tons of fodder per acre. Millet is a good crop running from 1¼ to 3 tons per acre and a good quality of seed. Broom Corn where tried has proven very successful. Flax makes a good crop. Rye and barley growing is proving a success:

All kinds of fruits, apples, peaches, pears, plums, cherries, grapes and berries of every vaplety where they have been given any attention, have demonstrated that this will 'n the future be a wonderful fruit producing country. Here frost does not kill nor insects blight and destroy. Most any kind of shade and forestrees do well mere. Pointoes yield from 200 to 500 bushels to the acre and are of fine quality. Canteloupes and watermeions are always coccilent.
