INTERIOR.

DOCUMENTO OFICIAL.

Comandancia general de Puebla y territorio de Tlaxcala.—Esmo. Sr.—En el momento de despachar el correo semanario he recibido por extraordinario un oficio del prefecto de San Juan de los Llanos, cuyo tenor es el siguiente.—“Son las cinco de la tarde en que he recibido del Sr. general D. Francisco Javier Gomez el oficio que á la letra copio.—El comandante militar en este momento me dice lo que copio.—Tengo la mas grata satisfaccion en comunicar á V. S. que el pronunciamiento verificado anoche á eso de las doce, por los ingratos capitanes del batallon de Tres-Villas D. Lorenzo Calderon, D. Victor Ravelo y D. Ambrosio Herrero, acompañados del subteniente del mismo cuerpo D. José María Morlet y de los oficiales retirados teniente coronel D. Ignacio Bobadilla, teniente D. Juan Carrasco, y segun se dice el teniente coronel graduado capitán del regimiento núm. 12, D. Manuel Guevara, ha sido completamente sofocado en este dia, pues la tropa del citado batallon que es á mi cargo, aunque por el pronto lograron sorprenderla, á pocos momentos principió á desertárseles, presentándoseme en el edificio que elegi para que se me reuniera, dándoseles al efecto aviso por varios conductos, de manera que á eso de las ocho de la mañana, logré contar con la fuerza de unos setenta hombres. Todo el resto de oficiales de dicho batallon se me presentó á pocos momentos que supieron el escandaloso pronunciamiento del cuartel y contribuyeron en mucha parte á que la tropa abandonase á los traidores, y éstos convencidos del ningun prestigio que tenían en ella al ver como se le separaba, sin embargo de las precauciones que tomaron para evitarlo, se pusieron en marcha á las ocho de la mañana, con direccion á Orizava. Llegaba la fuerza á lo mas á setenta hombres que les quedaban y eso es la mayoría de reclutas, pues los soldados antiguos fueron los que se me pasaron, y en consecuencia hice salir sobre ellos la espresada fuerza que ya tenia reunida al mando del capitán de cazadores D. Joaquin Cervantes, con objeto de proteger la desercion que no cesaba en el enemigo aun yendo sobre la marcha.—En el punto de las Trancas llegaron á romper el fuego, que duró por mas de una hora, de que resultó completamente dispersa la

fuerza contraria, y dejando en el camino sus muertos y heridos, marcharon en aquel desórden unos cuantos hombres, habiéndoseles quitado el parque y equipages.

La division que salió de aquí ha regresado ya y por consiguiente queda restablecido el órden en este punto; y en tal concepto V. S. podrá con vista é igualmente de las circunstancias que llaman su atencion por ese rumbo, resolver lo que crea mas conveniente, en cuanto á la marcha que tenia resuelta hoy con objeto de ausiliarme como manifiesta en oficio de esta misma fecha que recibí por extraordinario.—Y lo transcribo á V. S. para que se sirva inmediatamente comunicarlo al comandante general de Puebla para su satisfaccion, advirtiéndole que en este momento marcho para San Andrés con la seccion de mi mando, á esperar los auxilios de boca y guerra que tengo pedidos, siendo el mas interesante que tornen para aquel punto las compañías de caballería que fueron á dicha ciudad á las órdenes del teniente coronel D. Manuel de los Rios; todo lo que tengo el honor de comunicar, reproduciéndole las consideraciones de mi aprecio.—Y lo transcribo á V. E. para que se sirva elevarlo al alto conocimiento del Esmo. Sr. vice-presidente, protestándole con tal motivo las consideraciones de mi distinguido aprecio.—Dios y libertad. Puebla, setiembre 8 de 1833. Cosme Fátong.—Esmo. Sr. ministro de la guerra y marina.

PUEBLA, AGOSTO 29.

Muchos federalistas de esta ciudad, religiosos sin hipocresía ni fanatismo, dispusieron hacer un novenario solemne en el convento de Santa Clara, dedicado al Sr. S. Roque, implorando su mediacion para con Dios nuestro Señor, que nos libre de los estragos de la terrible epidemia que ya invadió, aunque benignamente, á esta hermosa ciudad. La procesion en que se llevó al Santo desde el convento de nuestra Señora de la Soledad en que estaba, fué edificante, lo mismo que lo han sido los ejercicios espirituales de mañana, tarde y noche; pero lo mas apreciable es que los predicadores que lo han sido eclesiásticos sabios y virtuosos, no han predicado mas que el Evangelio puro, ecshortando á los fieles á la penitencia verdadera, que es la que destraza los corazones y no los vestidos, la que muda el corazon y no los semblantes. Al

contrario otros eclesiásticos en otros novenarios, (segun se nos ha informado) abusando de su ministerio sagrado, no han hablado mas que de *heregia*, de *ataques* que suponen dados á la *religion*, de libertad é *ideas liberales*, de salir á pelear y derramar la propia sangre en defensa del *dogma católico* y de la iglesia perseguida, con otras especies que se ha dicho y parece con justicia que no son mas que comentarios ó esplanaciones del primer artículo del plan de Arista. ¡Qué crueldad! Convertirse de enviados para el consuelo de los fieles, en atizadores de la desastrosa guerra civil, que ha tomado el pretexto por quien la provocó; lo mismo que se trata de persuadir en los pólpitos. Suponemos que habiendo impiedad y heregia, fuera preciso declamar contra ella; pero ¿no seria en estas circunstancias necesario y conveniente usar de algunas precauciones oratorias; advirtiéndole á los oyentes que las ecshortaciones no servirían de excusa á los que ultrajan la religion, cuando se dice que la defienden? ¡Qué nada de lo que se decía era con el objeto de dividir los ánimos, que la obediencia al gobierno era un deber impuesto por el mismo Dios á todos los cristianos? Este seria el modo de combinar los extremos, de evitar el abuso de lo que se dice con buena intencion, y de unir los ánimos; pues que “todo celo por la verdad que no es caritativo, dice San Francisco de Sales, nace de una piedad que no es verdadera.” Concluimos invitando al Sr. D. José Obando, que funge de gobernador, que cele y que contenga el mal, pues los frutos de las predicaciones de que hablamos, ya se experimentan en los pasquines que se fijan en las esquinas, y en que se lee *defendamos la religion, muera el gobierno*, y otras alarmas que traerán funestísimos resultados.

VERACRUZ, SETIEMBRE 1.º

Continuando nuestros raciocinios sobre la educacion, descenderemos hoy á la de las mugeres, tan abandonada por desgracia entre nosotros. Las mugeres, que con la leche de sus pechos, con sus cuidados, con sus tiernas caricias, nos alimentan desde la infancia y nos imprimen aquellas ideas que sirven de base á nuestra educacion moral y civil, están condenadas á vivir oprimidas por la ignorancia y la mas ciega preocupacion. El caticismo del padre Ripalda, innumerables cuentos de viejas, el baile, la música, la

aguja, las visitas y las tertulias; he aquí por lo comun toda la ciencia que aprenden las jóvenes que deben gobernar las familias algun dia.

Una madre se considera vigilante y celosa de su casa cuando aflige á su inocente hija por bagatelas que debiera enseñarle á despreciar. En lugar de alimentar su corazon con los saludables consejos de la virtud, de hacerla entender los deberes que ha de observar algun dia, de fortalecer su entendimiento con racionales capaces de hacerla buena madre, la educacion que ordinariamente le dá, no tiene al parecer mas objeto que inspirar la el gusto de la moda y el de la vanidad, hacerla cuidar de las gracias de su cuerpo, y abandonar enteramente los adornos del alma. El modo comun de educar á las niñas dá á entender que la naturaleza les niega el don de la racionalidad. La ocupacion á que se les destina, es el adorno y las modas, y no se les conversa mas que de bailes, de tertulias y espectáculos: la desenvoltura es una máxima que se les enseña para ganar el aprecio y las adoraciones del otro sexo; y se les imprimen todas las ideas capaces de irritar las pasiones, en lugar de inspirarles el horror del vicio y de las acciones deshonestas.

No es de admirar, pues, que las mugeres criadas con estas lecciones impudentes, cometan yerros muy trascendentales á su honestidad, y carezcan de las virtudes necesarias para contribuir á la felicidad suya y de los demas. Parece que hay un temor fundado de que las cualidades morales del espíritu perjudiquen á los adornos visibles del cuerpo. ¡Triste error! ¡No vale mas ilustrar el entendimiento, que es el realce de la hermosura, el que fortalece la virtud y hace durables los encantos de la vida? Una joven entendida, bella y virtuosa, es el objeto mas interesante que la naturaleza puede presentar á nuestra vida.

No recele este seco encantador, destinado á las delicias que disfruta el hombre, de cultivar su entendimiento y su razon: de esta manera ejercerá un dominio alhagüeño, en lugar de ese poder tan propenso al odio cuando se acaba la ilusion. Entónces las mugeres se grangearán los rendimientos sinceros, los homenajes racionales, y abandonarán al olvido ese imperio efimero que ahora fundan en sus atractivos tan fáciles de marchitarse.

Nadie negará que de las costumbres de las mugeres nacen los hábitos que influyen en la suerte de los hombres. Por consiguiente, debe todo convencernos que mas cuidado en la educacion de esa mitad estimable del género humano, traeria una mudanza feliz y provechosa para la otra. Creemos, pues, que el estado fijará su atencion con interes en esa materia, y que proveerá lo que convenga á efecto de procurar la ilustracion de las mugeres, como que su trato, sus atractivos, sus cuidados y su natural ternura contribuyen no poco á la sociabilidad de las costumbres.

ESTADO DE MICHOACAN.

MORELIA, SETIEMBRE 2 DE 1838.

Aunque en nuestros números anteriores nos ocupamos con sumo dolor de anunciar al público los estragos que hiciera en esta capital la desoladora epidemia que hoy aflige á muchos puntos de la república, no habia distraído nuestra atencion la muerte de algunos individuos en particular, á causa de que el cielo con benignidad habia precavido del terrible azote las personas que por su educacion, talentos y posicion que guardan en la sociedad moreliana, es igual la falta que produce su inexistencia al agudo sentimiento que al contemplar dilacera el corazon de todo buen ciudadano interesado en el lustre y mejoras de la misma sociedad; y sin embargo de que han sido de dos á tres de esta clase las que con suma pérdida de Michoacan han desaparecido de nuestra vista, solo ocupará por esta vez las columnas de este periódico la temprana y desgraciada muerte del señor ministro fiscal de la Escma. Audiencia del estado licenciado D. Miguel Macedo, que acaeció á las tres y media de la tarde del viernes 30 de agosto último, en la casa morada del Excmo. Sr. gobernador. ¡Ah! ¿Qué podremos decir que haga un cabal y merecido elogio de joven tan recomendable? A los treinta años que poco mas contaria de su lozana edad, habia desplegado de un modo estraordinario los talentos de que lo dotara la naturaleza: sus conocimientos nada comunes, tanto en el foro como en política, la viveza y energía de su carácter, agregada á la noble finura de los sentimientos de su alma, hacian desde luego el mejor panegiris de su amable personal, y no podia oirse la cultivada locucion de su voz, sin inspirar en el corazon del que lo escuchaba las sensaciones mas puras del cariño, con cuyas ventajas, rara vez reunidas en un objeto, se habia consagrado esclusivamente á la santa causa de la libertad, trabajando en una manera asidua é infatigable en resaturar á Michoacan, al lado del ejecutivo, de la situacion agonizante á que lo han reducido los implacables enemigos del pueblo. No se afanaba por otra cosa ni otra cosa se oia sonar en su boca, que grandiosas proposiciones relativas á la defensa y seguridad del estado, á la mejora de públicos establecimientos y á todo aquello que tendiera á dar vida y ornamento á esta interesante porcion de la república mexicana, de que se sigue que todo ciudadano que de veras ama á su patria, no puede menos que con llorosos ojos considerar la pérdida irreparable que se ha tenido en la desaparicion de este joven colmado de virtudes, y nosotros por nuestra parte dedicamos á sus merecimientos los tiernos recuerdos que demanda la sincera amistad con que quiso distinguirnos y que se llevó á la lúgubre mansion del sepulcro, en menos de nueve horas que duró su enfermedad, desde el primer ataque hasta el asaroso momento de su espiracion lamentable.

DERECHO PUBLICO AMERICANO.

Examen analítico de las constituciones formadas en Hispano-América.

(CONTINUA.)

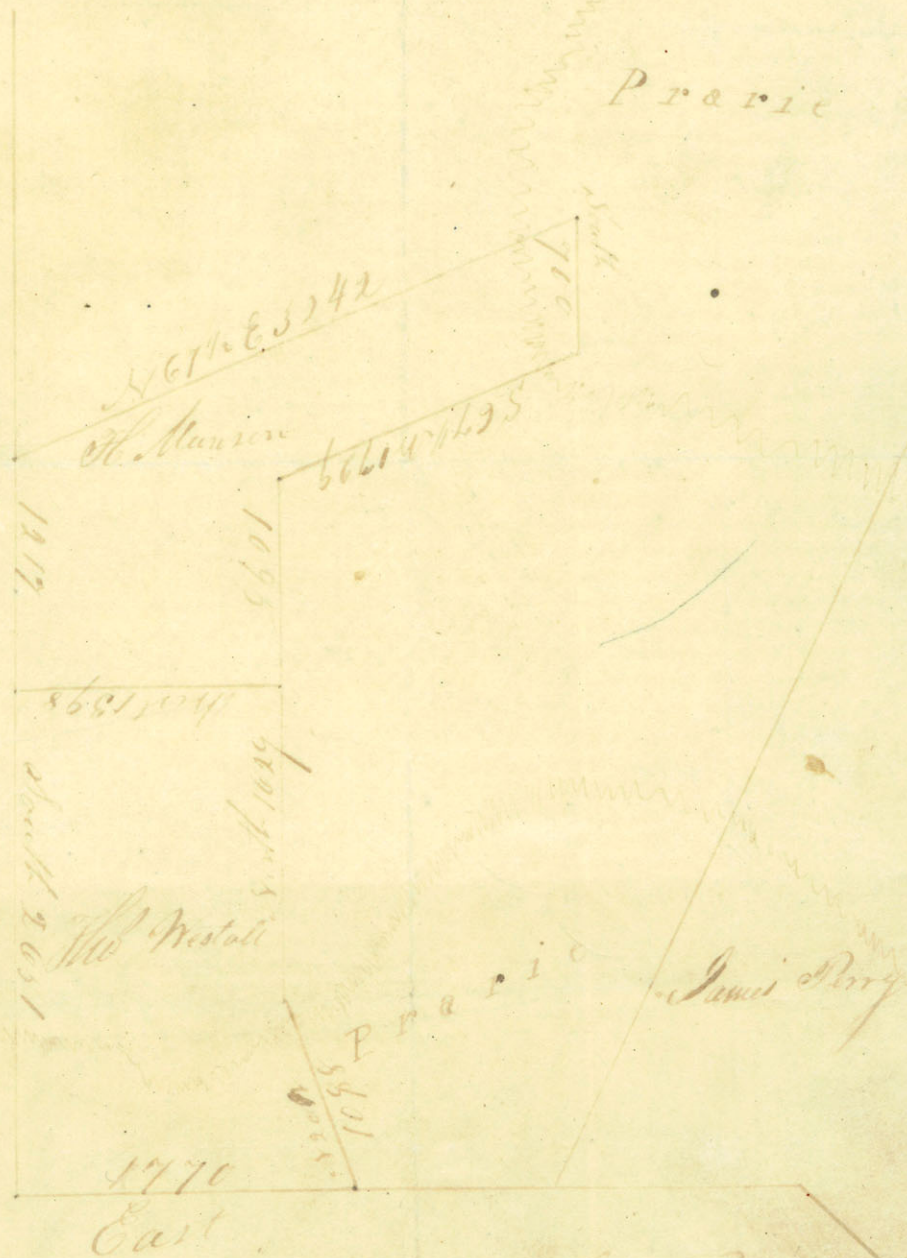

II.—COMPONEN EL CONGRESO NACIONAL.—*En España y América.*—Los diputados que cada provincia, estado ó departamento elige libre y popularmente.

III.—CONSTA EL CONGRESO.—*En España.*—De solo una cámara.

En México, Colombia, Perú, Guatemala y Chile.—De dos, á saber: cámara de diputados y senado.

Los legisladores americanos, conociendo los inconvenientes que trae el reducir á una sola cámara la representacion nacional, la dividieron en dos, segun se hizo en la república Anglo-americana, y segun lo han hecho otras naciones europeas, persuadidas que en ello se impedían los arrojados del patriotismo ecsaltado, y se balanceaba el equilibrio del poder legislativo. En la Península se hizo por el contrario un ensayo opuesto con la constitucion de Cádiz, prescindiendo de lo que habian establecido los antiguos legisladores, y los resultados quizá no han acreditado de acertada la novedad. Siquiera hubiérase suplido el inconveniente con haber dado forma de senado al consejo de estado, ó á la diputacion permanente, y se habria corregido el defecto cometido. Pero la estructura del consejo distaba mucho del objeto, y la de la diputacion circunscribia á un círculo tan pobre sus funciones, que la imposibilitaba de obrar, haciendo al mismo paso concebir á los ciudadanos ideas equivocadas de su influencia y autoridad. Reducida la representacion nacional á una sola cámara en la cesacion de sus sesiones á donde acudia el gobierno con las dudas ó dificultades que le ofrecia la ejecucion de sus deliberaciones? Para conocer el vacío de la ley fundamental en esta parte, y lo que facilita las operaciones gubernativas un senado bien constituido, es preciso haber sido secretario del despacho en la Península durante la época constitucional. Decretos importantes han quedado alguna vez entorpecidos, porque habiéndose cometido una conocida equivocacion en las córtes al estenderlos, el ministro carecia de facultades para enmendarlos ó esplicarlos y cerradas las sesiones, no habia autoridad alguna investida con poder suficiente para ejecutarlo, ni aun interinamente.

Cuando los ruidosos sucesos de julio de 1822 en Madrid, se tocó mas de lleno la falta de una corporacion senatoria. En medio del cruento aprieto en que los sublevados pusieron á las cortes y á la nacion, ¿qué hace el consejo de estado? Se preguntaban todos. ¿Qué hace la diputacion permanente? ¿Por qué no toman providencias? Pero ¿qué podía y debia hacer el primero, cuando la ley lo reducía á la clase pasiva de asesor del monarca, y en los casos en que requiriera su dictamen? ¿Qué debia ecsigirse á la segunda, ceñida á la institucion de tener todos los ca-

cortes?... Es preciso convenir en que en la estructura del régimen constitucional faltaba una rueda principal, llámase cámara ó senado; y nosotros no titubeamos en decirlo, sin que por ello padezca en nada el honor nacional, ni la opinion justamente adquirida de los legisladores de Cádiz, ni se nos pueda llamar con razon inconsecuentes en las nuestras.

IV.—BASE DE LA REPRESENTACION NACIONAL.—En España.—La poblacion de españoles y extranjeros naturalizados, en razon de un diputado por cada 70.000 almas.

En el Perú.—La poblacion en razon de un diputado por cada 120.

En México.—Id. uno por cada 80.000.

En Colombia.—Id. uno por cada 300 hasta que el número de diputados llegue á 100. En llegando á 150 en razon del aumento que vaya adquiriendo la poblacion, se elegirá uno por cada 400; y cuando esceda, uno por cada 500.

En Guatemala.—Id. uno por cada 300.

En Chile.—No baja el número de 50, ni pasa de 200 aunque progrese la poblacion.

Si en los gobiernos representativos la bondad de su constitucion sigue la razon directa del número de diputados del congreso, siendo mas popular aquel que le reuna mayor, deberemos reconocer ventajas sobre todos á el de Colombia, cuyas bases están mas sabiamente combinadas que las de los demas estados de América. La constitucion chilena en esta parte presenta una exclusiva opresora. Prohibir que el número de diputados esceda de 200 por mas que la poblacion progrese, en nuestra opinion es un contra-principio político de fatal trascendencia.

En la mencionada constitucion de Chile, ha llamado grandemente nuestra atencion el nombre que se da á los representantes del pueblo. En los tiempos antiguos se llamaban *procuradores*, es decir, *poder habientes del pueblo*, y tanto en la constitucion de Cádiz como en las que se han sancionado en América se les da el título de *diputados*, mas en Chile llevan el de *consultores*. „La cámara nacional, dice el artículo 60, tit. 9, es la reunion de consultores nacionales en una asamblea momentanea.” La letra de la ley indica que el pueblo ejerce en aquella república una soberania fantástica, ó que se le li-songea con decir que ésta reside esencialmente en él, al paso que se le limita á la clase de consejero, cuando trata de explicar sus facultades soberanas por medio de sus apoderados. Mas claro: en la república de Chile el pueblo es moralmente soberano, y asesor de otro cuando trata de llevar á efecto este atributo. Complicacion original, que no presentó hasta aquí la organizacion de ningun gobierno libre. Pedimos por merced, decian los procuradores de las cortes de Castilla, cuando discutian los intereses de la nacion, reducidos á la clase de consejeros, porque el ejercicio de la soberania no residia plena y absolutamente en sus manos.

V.—CALIDADES QUE DEBEN TENER LOS DIPUTADOS.—En España.—I.—Ser ciudadanos en el ejercicio de sus derechos.

II.—Mayores de 25 años.

III.—Naturales de la provincia que los nombra, ó avecinados en ella por 7 años.

IV.—Disfrutar una renta anual proporcionada, procedente de bienes propios.—Se suspende esta calidad hasta que las cortes decidan haber llegado el caso de escisipia.

En México.—I.—25 años de edad.

II.—Dos años de vecindad, ó haber nacido en el estado.

III.—Los extranjeros tendrán 8 de vecindad y 80 pesos de bienes raices en la república, ó industria que les produzca la de 10 cada año.

En Guatemala.—I.—23 años cumplidos.

II.—Ciudadanos en el ejercicio por 5 años.

III.—Los naturalizados deben tener un año de residencia no interrumpida anterior á la eleccion.

En Colombia.—I.—Tener derecho á votar en las elecciones.

II.—Saber leer y escribir.

III.—Mayor de 25 años y vecino ó natural de la provincia que le elige.

IV.—Dos años de residencia en la república inmediatamente á la eleccion.

V.—Ser dueños de fincas raices, cuyo valor llegue á 2.000 pesos, ó renta de 500, ó profesor de alguna ciencia.

En el Perú.—I.—Ciudadano en ejercicio.

II.—Mayor de 25 años.

III.—Haber nacido en la provincia ó estar avecinado en ella diez años antes de la eleccion.

IV.—Tener propiedad ó renta de 800 pesos ó ejercer alguna industria que los rinda anualmente, ó ser profesor público de alguna ciencia.

En Chile.—I.—Ser idóneo.

II.—La idoneidad resulta de la calificación del mérito cívico.

III.—El mérito cívico resulta de las siguientes calidades.

I.—Servir 5 años en las milicias nacionales; haber hecho alguna campaña honrosamente en servicio del estado.

II.—Haber mejorado una posesion rural; ser maestro ú oficial examinado en arte ó industria, cuyas primeras materias las produzca el pais; concurrir al establecimiento de fábricas; al de compañías de agricultura, minas ó comercio; proporcionar ocupacion útil á las mugeres y mendigos.

III.—Ocuparse algun tiempo en la instruccion gratuita moral, científica ó industrial; trabajar un escrito, ó hacer un descubrimiento que contribuya á la prosperidad nacional; estudio de medicina, filosofia moral y ciencias naturales; haber sido declarado benemérito por sus costumbres en los institutos de educacion; dedicarse á mejorar la moralidad religiosa y el culto sagrado.

IV.—Desempeñar graciosamente comisiones laboriosas por encargo de las autoridades públicas; servir útil y gratuitamente en las administraciones del estado; desempeñar sin interes las funciones municipales ó departamentales.

V.—Contribuir con su caudal, talentos ó trabajo personal á alguna obra pú-

blica; tener parte graciosa y considerable en los caminos, puentes, calzadas y demas obras que faciliten el trabajo.

VI.—Contribuir graciosamente y de un modo considerable al establecimiento y mejora de cárceles, correcciones, hospicios, institutos de beneficencia y obras de policia, comodidad, aseo y ornato; ocuparse en el servicio de personas miserables, de enfermos é impedidos.

VII.—Contribuir graciosamente á cualquier gasto fiscal ó público.

VIII.—Ser padre de mas de seis hijos legítimos.

A excepcion de Guatemala, en todas las constituciones se requiere como calidad precisa para obtener el importante cargo de diputado, la mayoria de edad, fijada en los 25 años. La de Chile guarda en esto un profundo silencio, á pesar de la larga enumeracion que hace de las circunstancias que deben adornar á los elegibles.

Vemos con placer que los legisladores americanos han mirado como base precisa para el nombramiento de los haberes procedentes de fincas ó industria, y lo han calificado de tan absolutamente preciso, como que han señalado las sumas sin que los detuviera el inconveniente de la poca divisibilidad de las propiedades y del atraso de la industria: consideraciones que hicieron á los legisladores de Cádiz diferir á una época incierta el plazo en que debia tener lugar en la Península una calidad absolutamente indispensable, para que los congresos nacionales se compongan de individuos verdaderamente interesados en el bien público, alejando de la influencia legislativa á los proletarios, que jamas pueden mirar con verdadero apego los intereses públicos.

De la comparacion de las constituciones resulta, que la de Cádiz limita la acepcion de la propiedad de un modo que aleja de las asambleas nacionales á muchos hombres útiles, de cuya cooperacion el estado debia sacar ventajas considerables.... Para ser diputado, dice el artículo 92, se requiere tener una renta anual proporcionada, procedente de bienes propios: decision demasiado vaga por no especificar la suma, que parece escluir á los dueños de fábricas y artes, y á los comerciantes y á los hombres dedicados á las profesiones científicas. Las constituciones de América han mejorado esta parte, admitiendo á todos á la participacion del honor del congreso, y fijando la cantidad.

Cuanto esta conducta hace altamente recomendable la sabiduria de los legisladores ultramarinos, apartando de ellos las acusaciones de ignorancia con que los sectarios del despotismo procuran, aunque en vano, desacreditarlos, otro tanto es digno de elogio el acierto con que los de Chile han fijado las calidades precisas de los diputados. Aunque los artículos de su constitucion pertenecen á la parte reglamentaria, agena de esta clase de leyes, y aunque algunas de las cualidades descubren demasiada generalidad, se resienten de alguna inesactitud, y quizá reducen demasiado el número de los elegibles, nosotros no podemos menos de alabar la idea que se han propuesto sus

autores, que deja libre al mérito el acceso á los escaños de la legislatura, aleja las pretensiones desmedidas del egoísmo, estimula á los hombres á distinguirse por acciones útiles y benéficas, y hace al congreso depositario de la ilustración y honradéz nacional.

NUEVOS APUNTES PARA LA HISTORIA DEL SEÑOR PORTUGAL.

Gobierno del estado.—Si entre los motivos que obligaron á esta guarnición al paso que manifiesta la proclama de V. S. y desenvuelve el plan que se ha servido remitirnos, no se descubriera el de sostener los fueros y privilegios del estado eclesiástico, nos prestaríamos á concurrir á la junta á que V. S. se ha servido convocarnos; mas versándose aquellos intereses, nuestra delicadeza nos impide el sufragar para la elección del jefe político que conforme al mismo plan, debe regir interinamente este estado, y á cuyo efecto se dirige la espresada junta. Por lo demás, nos animan los mismos sentimientos que á V. S., por la consecución y consolidación de la paz, y estamos prontos á cooperar en cuanto podamos, y no se oponga á la lenidad de nuestro estado, para adquirir un bien tan apreciable en lo moral y en lo político.

Sírvase V. S. recibir los testimonios de nuestra consideración y aprecio.—Dios guarde á V. S. muchos años.—Morelia 26 de mayo de 1833.—José María Rayón.—Pablo Domínguez.—Señor comandante D. Ignacio Escalada.

Es copia que certifico.—Morelia, setiembre 2 de 1833.—Cuervo.

¿Qué contestará el señor obispo de Michoacán á los terribles cargos que le resultan por la infidencia de unos hombres á quienes llamaba *medo de virtudes*? Si hemos de juzgar por analogía, creemos que S. R. es uno de los cooperadores en la actual revolución, y que no había mucha inesactitud en aquellas espresiones suyas que tomamos por hijas de un corazón recto y virtuoso: *Mis eclesiásticos no observarán otra conducta que la que vean en su prelado*. Cuando el Sr. Portugal decía esto, ya estaba indefectiblemente en su conocimiento la anterior contestación con sus *ejemplares curas* dieron á Escalada, adhiriéndose á su revolución y en la que *ofrecieron cooperar en cuanto pudieran*: si lo ignoraba (lo que nunca concederemos) ellos son unos hipócritas detestables que no escrupulizan engañar á su prelado y defensor *tan bueno*. ¡Cuántas inducciones muy naturales pueden sacarse de este nuevo descubrimiento! Es preciso no alucinarse, ni prodigar consideraciones á hombres vendidos á un príncipe extranjero; ellos nada perdonan para hundirnos en el abismo, y volvernos al yugo español. Firmeza; mucha firmeza, y hacerles sentir todo el peso de las leyes: ni la religión autoriza traicio-

nes, ni sus ministros están esentos de dar el cuello al verdugo: la ley es una para todos; ¡por qué se ha de aplicar al desvalido, y ha de dejarse el puñal en manos de quien puede hacer los mas formidables destrozos? ¡Doblemos la rodilla ante el sacerdote que en la casa del Señor ejerce los sacrosantos misterios; pero aquel mismo sacerdote respete y obedezca ante un tribunal la autoridad del magistrado, QUE NO EN VALDE TRAE LA ESPADA.

FANATISMO.

La idea de fanático y la de loco se asocian como sinónimas, porque en efecto, ¿qué otra cosa es un fanático sino un hombre que ha perdido la facultad de hacer raciocinios rectos y que mira los objetos de una manera diversa de lo que son en sí? Este trastorno mental lo persuade que el hombre objeto de su encono lleva á cuestas la maldición de Dios, que es familiar del demonio, que su existencia en la sociedad es mas contagiosa que la fiebre amarilla, que ha perdido todas las garantías, que es una acción meritória asesinarlo, en suma los españoles hacían creer que tenía cola y una noche les era bastante para recorrer todo el universo con la velocidad del pensamiento, llevando tras sí cuantos males son imaginables. Preguntamos: ¿no se parecen los caprichos de este héroe fabuloso á los gigantes, castillos, ejércitos y doncellas desvalidas que revoloteaban en el miserable cerebro de D. Quijote?...

De tantas estravagancias formaba en otros tiempos nuestro clero un dogma religioso, y la inquisición quemaba al que no creía tamaños desatinos: semejantes necedades contribuían eficazmente á su sistema político y financiero, porque nos conducían cual rebaño de ovejas: amenazando con el infierno, nos inspiraban aversión á la libertad, como hermana del demonio, creaban el odio contra los extranjeros como hijos de Satanás, y percibían gruesas sumas por conjuros y desencantamientos.

Es cierto que nuestra revolución política ha proscripto muchas de estas patrañas, pero fueron muy hondas las raíces del fanatismo para arrancarlas del todo: todavía los infames asesinos creen dirigido su puñal por la mano del Eterno, ó afectan creerlo para perpetrar atroces venganzas; pero el loco por la pena es cuerdo, y no estamos en el caso de que ellos cubran de infamia el nombre mexicano con actos de la mas estúpida barbarie. Rasgos de fanatismo son los acontecimientos de Zacualpan y un ejemplar de escarmiento debe curar esa debilidad cerebral, para que la vindicta pública tenga su debida satisfacción y los extranjeros y mexicanos una garantía. Hay cierta clase de delitos que aunque comunes, demandan presta represión por las circunstancias que los modifican y el que nos ocupa es uno de ellos.

PERIÓDICOS DE LA CAPITAL.

[Estracto.]

TELEGRAFO.—Día 11.—Contestación del Excmo. Sr. presidente al aviso de la

prisión de Escalada, en que escita al gobierno le aplique todo el rigor de las leyes.—El Sr. Gracida informa que el Chólera ha casi desaparecido en los cuarteles que ha recorrido, siendo muy raro el caso que se presenta.—Lista de los generales, gefes y oficiales que se han dado de baja en el ejército.—Un remitido cuyo objeto es prevenir los malos efectos que producirá el ácido nítrico en la curación del Chólera, teniendo la inadvertencia de medir aquel líquido en cuchara de metal: deberá hacerse en alguna basija de cristal.

DEMÓCRATA.—Día 11.—Análisis de un folleto desatinado de Oajaca, impreso por los defensores de la religion y fueros que han jurado *contra federación ó muerte*: el desagradecido doctor Quiñones emigrado de Goatemala es su redactor, en consonancia con el otro su compañero Betancourt: segun de estilo, inventan millares de triunfos conseguidos por Arista y desastres en nuestras armas: forman un grande elogio del *valiente y equitativo* Canalizo, que segun los dogmas de la religion pronunciada, saquea, mata é incendia como los jesuitas, *ad majorem Dei gloriam*.—En los periódicos de Norte-América se vaticina felizmente de nuestra revolución y de los progresos que podremos hacer en la carrera comenzada, planteando reformas útiles que reclaman las luces del siglo y la felicidad nacional.—Los gabinetes de Viena, San Petersburgo y Berlin, han celebrano una estrecha alianza, no solo para los casos ordinarios de policia, sino particularmente para contrarrestar cualesquiera planes de Inglaterra y Francia que tiendan á propagar las ideas liberales, y á sacar de la opresión á los pueblos de Europa.

AVISOS.

DE conformidad con un decreto de la alta corte de chancillería de Inglaterra dado en las causas de Quintana contra Witherby, y Witherby contra Quintana, los acreedores del finado D. Francisco de Borja Migoni, de Token house Yard en la ciudad de Londres, comerciante (que falleció el 7 de diciembre de 1831, poco mas ó menos) deben presentarse, y probar sus deudas ante el Sr. D. Guillermo Brougham, uno de los empleados en dicha corte, en su despacho Sauthampton Buildings, Chancery Lane, Londres, ó por su falta serán escludidos del beneficio del dicho decreto. 4
