I have now forwarded  
the notes of Mr Kimbro's survey, which you  
returned as being incorrect. You will  
observe that I have somewhat altered the  
phraseology of the notes - but have no  
wise interfered with the first intention;  
I failed in expressing clearly & with propriety  
the first thousand varas, in as much as that  
formed no part of the survey - only in-  
trodutory - to designate the beginning  
therefore I have omitted it in the copy,  
at an examination it will be found  
superfluous, Your friend

Gov.

Señor Don Antonio Nixon

Dr. Sir;

I have here with enclosing  
the field notes of a survey made for Mr Joel  
Walker, fronting upon the Atoyaque River, Three thou-  
sand, two hundred and fifty varas, being seven hundred  
and fifty varas more than the usual front allowed  
on such streams, but, as there was only a small tract  
of vacant land, lying between R. Polini's survey, and  
a survey of Eleven leagues made, for Juan José Ybarbo,  
(the distance between the said lines being but 44,500 va-  
ras,) there was not room for two leagues, conse-  
quently (not being permitted to leave vacancies) I have di-  
vided the said tract, in such a manner, as to leave  
(after making Walker's survey) one fourth of a league.

Very respectfully

Yr friend, &c. &c. &c.
