**T**HIS GUIDE BOOK and Compilation of Facts concerning Dallas has been carefully checked for accuracy in giving directions which will enable our citizens and visitors to safely reach their desired destination without loss of time or expense.

This is strictly a Guide Book of Greater Dallas, made from personal search and the public records. It does not attempt to list or show the program or schedule of activities to be held within the Exposition grounds, which subjects will be fully covered by our daily newspapers, and by such booklets as may be issued directly by the Texas Centennial Central Exposition.

Everyone should realize that Dallas is now a great city, and that courtesy and helpfulness in directing strangers will create a most favorable impression in the minds of our Centennial visitors.

Every resident of Dallas should know his own city, its industries, merchants, hotels, office buildings and transportation arteries.

Many of our newcomers may decide to make their new home in Dallas and will find the information you give them to be of great help.

The maps show our principal highways and crosstown streets, as well as our house numbering systems, street railway service and highways.

We suggest that you take a few minutes to study the maps and read our directions on "How to Use This Book" and you will then be able to locate your destination and be of help to your friends in showing the many advantages of Big Dallas.

## HOW TO USE THIS BOOK

Fancy endings of Street names such as STREET—AVENUE—BOULEVARD—COURT—PLACE—LANE—TERRACE—PARKWAY—DRIVE—ROAD or ALLEY—are omitted when there is but one name for the same Street. However, where Street names are duplicated by two or more Streets located in different parts of Greater Dallas then we have shown such distinctions.

This book contains all important Streets, Alleys and Courts located within one mile of the city limits of Dallas, Highland Park and University Park. It does not attempt to show rural settlements, nor conflicting names carried by Real Estate Subdivisions outside. Neither does it show all unimproved platted lands, nor cabin sites, fishing camps and rural mail routes.

- (1) All streets are listed in alphabetical order.  
(2) Then an abbreviation is given for the part of town where the street is located, such as:
- N. D. for North Dallas
  - E. D. for East Dallas
  - S. D. for South Dallas
  - H. P. for Highland Park
  - O. C. for Oak Cliff
  - T. H. for Trinity Heights
  - U. P. for University Park
  - W. D. for West Dallas

Other sections are spelled in full as, Oaklawn, Love Field, Lakewood, etc.

- (3) Then is given the relative location of the street such as 6700 N—meaning it is 67 blocks North of the base line, or 3000 E—meaning it is 30 blocks East of the base line.
- (4) Then is given the house numbers used on said street, such as: 100 to 1000 E—meaning the street is 10 blocks long and runs East from the North and South base line.
- (5) Then follows the nearest car line.
- (6) The letter X when used in connection with a car line description signifies crossing. Thus "Swiss line X 2600" means it crosses that particular street at its 2600 blk.
- (7) If the car line description reads "Vickery bus X 900 to 5400" it means that car line runs the entire distance on said street.
- (8) If the car line description reads "Ewing bus X 2000 & 2600., it means that car line crosses said street at both its 2000 blk and its 2600 blk.
- (9) Several suburban areas outside the city limits are not served by the Dallas Railway & Terminal Company, yet we have shown the names of bus routes nearby. For these busses you should go to the Interurban & Bus Station at Jackson & Browder Streets and purchase tickets.

(10) See map for location and routes of the various car lines and buses. Auto drivers will find this helpful in locating streets.

## HOUSE NUMBERING SYSTEM

Even though Dallas has many short streets yet they are easy to find by the use of our key map and numbering system.

The Trinity River is the base line for East numbering in Dallas.

Beckley Ave. is the base line for East and West numbering in Oak Cliff, Trinity Heights and West Dallas.

**Study the Key Map in back of this book.**

## HIGHLAND PARK AND UNIVERSITY PARK

In a small part of North Dallas, Highland Park and University Park the streets which run East and West carry the same relative numbering as is used on Cole and McKinney Avenues which run almost due North. However, in Highland Park and University Park, they have reversed the numbering of their streets which run North and South, and for their East and West numbering use Hillcrest Avenue as their base; Hillcrest Avenue being the 3400 block and the street that the Highland Park line runs on; street numbers increase going West from Hillcrest Avenue and decrease going East.

## NORTH AND NORTHEAST DALLAS

In North and Northeast Dallas, the street numbers are carried due north on Greenville Avenue, with Ross Avenue (the 1700 block North) being used as a base line for North numbering. Also Greenville Avenue being the main highway running due North is used as a base line for East and West numbering, using Greenville Avenue as the 5700 block East.

As the numbers decrease going West from Greenville Avenue, and because of the system used in Highland Park and University Park we find at Keating Avenue (the right-of-way of the H. & T. C. Railway), a wide discrepancy—the numbers beginning at 5000 East on the East side of the railway and around 2900 West on the West side of Keating Avenue.

**RIDE THE STREET CARS!**

**LOVE FIELD AND NORTHWEST DALLAS**

The section lying Northwest of the Oak Lawn district has been using Maple Avenue (the 2500 block East) as a base line for East and West numbering and have carried Northward the numbering system used in the Oak Lawn district.

For more complete information and extended descriptions together with a full set of sectional maps, we recommend our regular edition for sale at \$1.00 per copy available at all book stores and news dealers.

**SPELLING OF STREET NAMES**

**Watch Your Vowels—A, E, I, O, U**

Many streets are often pronounced wrong or written down incorrectly. In some cases there are streets in Greater Dallas which may sound the same when spoken, but which are separate and distinct streets.

**Watch Your Vowels and Your Spelling.** If you do not find your street in this alphabetical arrangement, then try it again by changing the vowels.

**HOUSE NUMBERS**

In Dallas, Oak Cliff and Trinity Heights the even numbers are on the South and East sides of the streets—odd numbers are on the North and West.

In Highland Park and University Park the even numbers are on the North and East sides of the streets—odd numbers are on the South and West.

**LOCATING PEOPLE BY PHONE NUMBERS**

The Phone Book lists all phones with the central office prefix shown first then follows a dash (—) and then four digits.
